

THE EMOTION
OF LIGHT

IL FANALE

OVER 40 YEAR HISTORY

1979 - today

We illuminate the spaces of everyday life with lamps that combine sophisticated design with craftsmanship.

Our family-run business has believed in the craftsmanship and beauty of made in Italy design since 1979. We prefer to use our hands, head and heart rather than machines. In this way, each one of our products acquires a unique character.

Each collection has an essence, a fusion of materials and emotions.

CONTEMPORARY SHAPES MEDITERRANEAN SOUL

We illuminate the everyday
life spaces with lamps
that combine design and
craftsmanship.

Materials are at the heart of our design. We have chosen to use prestigious materials such as *brass, copper and iron*: we treat them by hand using special techniques that give each piece a unique and unrepeatabe look. We combine them with the finest local materials such as Murano glass and Bassano ceramics.

BESPOKE

Nohasi Palace, Puglia, Italy - Custom Solution of pendant lamp with 16 spheres - Photo by Sergio De Riccardis

We believe that every place conveys uniqueness. We therefore offer *customised solutions* for any setting, from homes to the contract sector, from one-offs to major projects.

The concept of '*custom-made*' comes from the world of fashion: it means designing and then creating something bespoke. We have also introduced it into our work, making it tailored: local production and awareness of the theme of design allow us to develop any idea, without any limits in terms of shape, scale or combination of materials.

REFERENCES

We have shaped great projects all over the world, from private houses to public spaces.

The starting point for a custom-made project is always dialogue with the customer, architect or interior designer. The customer provides us with an idea of the practical requirements, the style, the characteristics of the space and the expectations regarding the quality of lighting. We quickly and efficiently achieve the end product, a perfect fusion of lighting design, craftsmanship and technology, over 40 years of experience make us overcome technical obstacles.

THREE DIFFERENT STYLES

Designforus expresses the perfect balance of form, function and technology. It is the post-modern expression of a timeless contemporary style that comprises minimalism and décor.

Vintage influences paired with dark, shaded tones are all dominated by metal. **Industrialforus** has a dynamic metropolitan character that is always modern and perfect in any context.

Inspired by tradition, the **Classicforus** picks up materials, shapes and colours from the past and reinterprets them in a contemporary key.
